

Senior Scientist Job Posting

April 13, 2017

KIYATEC Inc. is a privately held life science company located in Greenville, SC focused on developing novel 3D cell-based assays for use in preclinical drug discovery and clinical therapy applications. KIYATEC has an active contract research project portfolio performing standard and custom cell-based assays for biopharma clients as well as research and development contracts funded by the National Cancer Institute to develop advanced 3D cell culture models of breast cancer, glioblastoma, and lung cancer. KIYATEC is an Equal Opportunity Employer.

The Senior Scientist is a full-time position with the primary goal of managing and supporting the execution of contracts established with biopharma clients. This position will include and require experience with project management, personnel oversight, GLP compliant documentation and reporting, and 3D tissue culture. The position will be split equally between bench work and office work, will require interaction with clients, and will report directly to the Scientific Director.

Laboratory Roles and Responsibilities:

- Laboratory research skills that include:
 - Cell culture techniques, both 2D and 3D are required and
 - Perfusion bioreactor experience is desirable
 - An understanding of flow cytometry and FACS is required
 - Experience with RT-PCR, histology, and/or microarrays is desirable
- Strong computational and statistical skills using MS Excel and/or statistical software
- Good communication and presentation style to effectively report results
- Awareness of existing and new scientific protocols by conducting literature reviews to provide understanding of tumor cell biology, development and behavior
- Collaboration with other KIYATEC R&D scientists, external scientists and clients
- Developing and writing of Standard Operating Procedures (SOP) and Study Protocols
- Observe strict documentation and good laboratory practice procedures
- Assist with cost tracking of experimentation and budgeting exercises
- Project management skills to ensure timely execution of project tasks and milestones

General Responsibilities:

- A team player with positive attitude
- Maintain clean and organized work space
- Attentive to project details
- Ability to work independently with minimal supervision
- Coordinate with team to balance resource needs
- Participate in weekly research meetings

Education and Experience:

- M.S. with 7-10 years of experience or a Ph.D. with 3-5 years of post-doctoral experience in biological sciences, cell biology, molecular biology or comparable discipline
- Extensive project management experience is required
- Experience with employee supervision is required
- Cell culture experience, 3D culture and/or primary human cell culture is required
- Professional experience in a contract laboratory environment desirable
- Immediate availability for full-time employment and authorization to work in the United States

Interested individuals should send resume and cover letter to [s_scientist_posting1@kiyatec.com](mailto:scientist_posting1@kiyatec.com).
